Profile

I, **Bishwa Prem Pangeni**, Computer Engineering graduate with academic and professional experience in software development. I have practical exposure to full-stack web technologies gained through industry employment, and independent technical projects. My background includes application development, database systems, and modern web architectures, with a growing academic interest in information security and cybersecurity systems.

Skills

Languages: Javascript, C++, Python, SQL

Technologies & Tools: ReactJS, NodeJS, RabbitMQ, Redis, MongoDB, PostgreSQL, JSON Forms, Docker, Microservices Architecture, Git, WordPress

Education

Kathmandu University

Sept 2019 – August 2024

B.E. in Computer Engineering

- GPA: 3.55/4.0
- **Coursework:** Object Oriented Programming, Data Structures and Algorithms, Computer Architecture, Comparison of Learning Algorithms, Computational Theory

Experience

Associate Software Engineer

June 2024 – June 2025

ComplianceQuest – *Kathmandu, Nepal*

- Implemented drag-and-drop functionality using the React DnD library to allow dynamic field placement (e.g., text fields) within tables
- Wrote unit tests for existing React components using Jest to ensure component reliability and code coverage
- Identified and resolved security vulnerabilities flagged by OWASP in the application
- Resolved a race condition between manual save and auto-save functionalities by implementing synchronization logic to ensure data consistency and prevent conflicts on state changes
- Redesigned the UI and refactored React components for improved performance and maintainability on `dev.forms.compliancequest.com`

Software Engineer Intern

April 2024 – June 2024

ComplianceQuest – *Kathmandu, Nepal*

- Designed a user interface for a Project Management Software in Figma, ensuring alignment with Salesforce requirements.
- Developed an application on the Salesforce Platform to assist Scrum Masters in managing projects and seat allocations.

Freelance Web Development

March 2024

BFI Nepal – *Remote*

- Designed and developed the official website for BFI Nepal using WordPress, improving accessibility and brand presence.

Professional Registration

Nepal Engineering Council (NEC) Licensing Examination

Aug 2025 – Nov 2025

- Completed structured preparation for the Nepal Engineering Council (NEC) Licensing Examination
- Successfully passed the NEC Licensing Examination in November
- Obtained professional eligibility to practice as a Computer Engineer in Nepal

Projects

MoneyMap

MoneyMap empowers you to track and manage your financial data effortlessly. Seamlessly organize expenses, income, and investments while staying updated with live stock market data.

Socio

Socio is a dynamic and innovative social media application designed to foster connections, empower expression, and promote positive engagement among users.

VideoChat

A video chat app developed using React and WebRTC technology. It leverages real-time communication to offer users a seamless and interactive video chatting experience.

NepseAPI

NEPSE Live Market Data Tracker API built with Cheerio web scraping. It empowers developers and financial analysts to stay updated with real-time market data in Nepal.

Resume-Generator

A web application built with Vanilla JavaScript to streamline the creation of professional resumes. It dynamically generates customizable templates based on user input.

Sports Management System

A full-stack sports management web application built using the MERN stack. Features include an admin portal, role-based authentication, and dynamic content management. The admin can add teams along with their images, which are uploaded and stored using Cloudinary.

Achievements

Office Chess Champion

ComplianceQuest – *Kathmandu, Nepal*

Secured first place in a company-wide chess tournament held at ComplianceQuest, competing against colleagues across multiple departments.
